

e-Invoice

Send paperless invoices and save!

Electronic invoicing, also known as e-invoice or e-billing, helps improve your entire billing process in both the short and the long run. According to international studies, up to € 51 can be saved for every order-to-cash process.

EDITEL offers customized e-Invoice solutions both for invoice issuers and invoice recipients. Data integrity and legal compliance are key. EDITEL meets all legal requirements at all stages (as audited by Deloitte), from invoice issuing to archiving.

Benefits of electronic invoicing

- › Significant savings (up to € 51 for every order-to-cash process)
- › Send paperless invoices
- › Detailed invoice clearing
- › Increased data quality
- › Efficient archiving
- › Sustainable solution

Benefits of EDITEL e-Invoice solutions

- › Standardized solution for all business partners (clients and/or invoice recipients)
- › Secure and traceable invoice delivery via eXite®
- › Customized invoice formats (EDI, PDF, XML, etc.)
- › Auditproof archiving (authenticity, integrity)
- › Full automation
- › Optional: electronic signature, time-stamping

eXite® e-Invoice-Solutions

EDI	PDF	SME**
<p>EDI Invoice</p> <ul style="list-style-type: none"> › Automated invoicing › Archiving › Managed EDI Service/ Inhouse › EU-compliant 	<p>PDF/PKI* Invoice</p> <ul style="list-style-type: none"> › Invoice as PDF › Signature & time stamp › Online access › EU-compliant 	<p>SME Invoice</p> <ul style="list-style-type: none"> › Online access › Archiving › Signature › EU-compliant

*PKI stands for Public Key Infrastructure, a system with which signed certificates are issued. E-invoice with PKI means therefore a signed electronic invoice.
 **SME stands for small and medium-sized enterprises

EDI e-Invoice

EDITEL's classic EDI e-Invoice solution allows clients to automate all stages of the invoicing process. We offer comprehensive services to efficiently process electronic invoices, ranging from the creation of electronic invoices in the corresponding EDI format to secure transmission via eXite® and legally compliant archiving. Clients can track the delivery status of their invoices at all times and also have the option of checking invoice data against order and delivery information.

PDF (PKI) e-Invoice

This solution is a great option for companies that issue large amounts of invoices to many small clients. All invoice data (EDIFACT, CSV, I-DOC, etc.) are exported from the company's ERP system and are used to create customizable PDF invoices. In addition, there is the option of signing these invoices (PKI) and adding auditproof archiving. PDF invoices are delivered to the invoice recipient via e-mail (including receipt) or they can alternatively be downloaded from a portal using a secure link.

Additional functionalities are also available, including time-stamping, reminder management and a variety of reports designed to ensure a secure invoicing process.

EDI e-Invoice for SMEs

The Web EDI solution tradeIT has been created to meet the needs of small and medium-sized businesses. Users rely on this online portal to manage electronic invoices, sent them to clients in the respective EDI format and archive the documents accordingly. This option does not require any software implementation and is immediately ready to use.

Digital Archiving

Whichever e-Invoice solution you choose, EDITEL offers legally compliant and auditproof archiving solutions for invoice data, thus ensuring the legally mandated document integrity and authenticity during the entire storage period. At EDITEL, we will be happy to discuss the option that fits your needs.

e-Invoice for international businesses

Legal requirements vary widely from country to country, and meeting them can be a challenge for corporations with international business activities. Local (especially legal) requirements are oftentimes difficult to account for in centrally managed IT systems. EDITEL has country-specific e-invoicing expertise. Thanks to our dedicated international e-Invoice center, we take into account local and market-specific conditions without the need to adapt our clients' systems.

Legal requirements for electronic invoicing

Electronic invoices must meet four requirements to be eligible for tax deductions:

- › The electronic invoice's authenticity of the origin
- › Integrity of content
- › Legibility
(humans must be able to read the content)
- › Consent by the entity receiving the service to receive electronic invoices

Please contact your local EDITEL office to learn more about the legal regulations in your country.
