1 THE RISE OF E-INVOICING: FROM FISCAL CONTROL TO STRATEGIC TRANSFORMATION

Electronic invoicing (e-invoicing) has become a powerful tool in the hands of governments to enhance **fiscal transparency**, fight **tax evasion**, and reduce the **VAT gap**. By enabling real-time or near real-time monitoring of transactions, e-invoicing helps detect underreporting, ghost companies, and fraudulent behavior—thus playing a central role in combating tax fraud and enforcing compliance.

Over time, its adoption has also brought tangible benefits to businesses, evolving from a basic paperless alternative into a driver of **process automation, accuracy, and cost reduction**.

The scope of e-invoicing has thus progressively expanded over the years:

- From B2G to B2B and B2C transactions, with national mandates now covering all sectors;
- Centralized platforms, such as Italy's SdI, ensuring auditability and standardization;
- Real-time reporting and interoperability, aligned with tax reform initiatives such as EU's **ViDA (VAT in the Digital Age)**;
- Adoption of standards, like the **EN16931** invoice format, the UBL (Universal Business Language) and **PEPPOL**, fostering secure, structured and cross-border invoice exchanges;
- Integration with ERP and cloud-based platforms, enabling scalable and streamlined operations.
- **Sustainability and ESG** concerns are also accelerating adoption, as e-invoicing reduces environmental impact by eliminating paper-based processes.

With over 80 countries now implementing or planning mandatory e-invoicing regimes, the trend is clear: digital invoicing is not just an efficiency tool, but a regulatory necessity and a strategic lever.

Tinexta Infocert has been a first mover in this evolution, having supported the Italian government's launch of mandatory e-invoicing: first for B2G in 2014, then for B2B in 2019.

2 TINEXTA INFOCERT: TRUST AT THE CORE OF DIGITAL TRANSFORMATION

Tinexta Infocert, part of the Tinexta Group, is **Europe's largest Qualified Trust Service Provider (QTSP)**.

Our mission is to enable trusted digital ecosystems that simplify compliance, improve security, and foster innovation.

Our unique strength lies in integrating **digital trust services**—like qualified e-signature, e-archiving, and certified delivery—with **business processes** in a seamless and scalable way. This makes us a reliable partner not just for trust services, but for complex, multi-country digital transformation initiatives.

As members of leading standardization bodies such as **CEN TC 434, OpenPEPPOL (Tinexta Infocert is a certified PEPPOL Access Point provider)**, and the **Technology Advisory Group** of the European Commission, we actively contribute to shaping the future of e-invoicing and e-delivery.

We also participate to EU-funded projects (EeISI, eIGOR, SCALES) and are official members of the **VIDA working group**.

Developed in response to Italy's early regulatory mandates, **Legalinvoice** has grown into a modular, secure and API-first solution enabling e-invoicing compliance across jurisdictions. **Legalinvoice is active in key countries like Italy, Germany, Belgium, Poland, Hungary, Portugal, Greece, Romania, Turkey, Saudi Arabia, Malaysia, Vietnam, with France and Spain coming soon.**

Through Legalinvoice, Tinexta Infocert is enabling compliant and efficient e-invoicing for **more than 62.000 legal entities worldwide, processing more than 200 million invoices.**

3 LEGALINVOICE HUB: GLOBAL E-INVOICING WITH BUILT-IN TRUST

LegalInvoice Hub is designed for medium and large organizations that need to manage complex, multi-country invoicing and compliance requirements.

The platform enables full integration with ERP systems and guarantees scalability across legal entities and geographies. In fact, it supports a **standard EN16931 format**, with local adaptations for each country; the platform also connects with many national tax authority portals and **PEPPOL** networks.

All entities and flows are unified under one global API and dashboard, ensuring **one source of truth**, and **no redundancy or data fragmentation**.

Key features:

1. **Global API** - A single, standardized interface for integrating LegalInvoice with any ERP system. Enables consistent handling of compliance workflows across different countries and systems.
2. **Global Dashboard** - A centralized and configurable dashboard to manage invoicing operations across multiple countries and legal entities. It provides real-time visibility into inbound and outbound flows, compliance status, errors, and audit trails—across the entire Accounts Payable (AP) and Accounts Receivable (AR) cycle.
3. **Multicompany Environment** - Manage different legal entities—potentially from different countries or subject to different fiscal frameworks—within a single unified platform, streamlining governance and harmonizing compliance efforts.
4. **Complete Invoice Management**
 - a. Centralized list of all active and passive e-invoices, retrieved both from ERP (via API) and from the tax authority's portal.
 - b. View metadata, full status history, and any related documents (e.g. purchase orders, attachments).
 - c. Conversion from PDF or CSV formats to the desired compliant format.
 - d. Download invoices in both XML and PDF courtesy formats.
 - e. Export entire invoice datasets in CSV format for reporting or reconciliation.
5. **Advanced Search Engine** - A powerful search module with multiple filters (e.g. date, entity, country, status, type) to easily locate and analyze specific documents.
6. **Qualified Trust Services Integration**
 - a. Qualified electronic signature, seal and timestamp;
 - b. Certified e-delivery with GoNotice (ETSI ERDS-compliant);
 - c. Long-term electronic archiving via SAFE LTA, in accordance with eIDAS and local regulations.
7. **Automation and Intelligence**
 - a. Classif-AI, the intelligent classification and reconciliation engine that automates AP workflows;
 - b. Cybersecurity features to detect and block malicious attachments in incoming invoice flows.

4 **LEGALINVOICE START: READY-TO-USE FOR FREELANCERS AND SMALL BUSINESSES**

LegalInvoice Start is the simple, fast and secure web platform designed for SMEs and professionals. It offers an immediate and compliant solution that can be accessed from any device—PCs, smartphones, or tablets.

Key capabilities include:

- Issuing, receiving, and archiving e-invoices and related documents;
- Monitoring cashflow, VAT accounts and journal entries;
- Direct sharing with tax advisors;
- Automatic deadline reminders and simplified customer/product management.

5 CONCLUSION

While many organizations see e-invoicing as a regulatory burden, **Legalinvoice turns it into a strategic opportunity.**

By combining compliance automation, operational intelligence, and trusted digital services, Tinexta InfoCert helps businesses:

- Simplify global e-invoicing;
- Improve decision-making with real-time data;
- Strengthen trust with stakeholders;
- And remain future-proof as regulations evolve.
