Exchange Summit Americas

E-Invoicing / E-Billing: Accelerator for Digitization

Kreuzlingen, Switzerland, March 2018 - E-Invoicing, a fundamental element in the digitization of the P2P process, is more than ever an important topic for the majority of companies around the world. With the U.S. aiming to define a standard and LATAM regulation constantly moving for new requirements a diversity of challenges needs to be faced.

In its third edition the Exchange Summit comes back to Miami on May 8 and 9 2018. It will offer insights into the latest market trends in the U.S., LATAM, Australia and Europe, covering current topics like E-Invoicing, Supply Chain Finance, Blockchain and AP/AR-Automation. User case studies from Nokia, Oath/yahoo, Pearson, Grupo Bimbo and many more will show how to maximize ROI in a global E-Invoicing roll-out project, how to keep E-Invoicing compliant and highlight where Robotic Process Automation will fit in.

A high level panel will debate the crucial question of standards and interoperability on the first congress day. On the second day the latest developments in Real Time Payments OASIS UBL and OASIS BDX will be covered. On May 7, preceding the Exchange Summit Americas, the E-Invoicing working group of the Business Payments Coalition will convene to review a standard and guidelines for an interoperability framework for the U.S.

Among other highlights Levine Naidoo, former Program Delivery Lead on the Digital Business Council's initiative will share lessons learned from Australia and New Zealand and Vinicius Pimentel de Freitas, Head International E-Invoicing Coordination CIAT, will explore what is happening in Latin America: Mexico, Chile, Brazil, Colombia, Panama, Costa Rica and beyond.

Following the Exchange Summit Americas, Open PEPPOL invites to a meeting on PEPPOL E-Invoicing as the driver for standardization of the procurement process.

About the Exchange Summit

After 11 years of running the Exchange Summit in Europe very successfully, it was time to expand to the Americas in 2016. Up-to-date breakout sessions mixed with panel discussions, parallel streams and the exhibition give insights into all the important topics. Always welcoming high level participants, such as CFOs, heads of A/R and A/P, procurement, invoice management, supply chain management and IT, representing companies that are already using E-Invoicing or planning to start soon, the Exchange Summit is THE networking place for the E-Invoicing community.
